

Photoshop

Photo Retouching – Island Picture

1. Download the following file from Google Classroom: *retouchrepair.jpg*
2. Save file in your Photoshop folder as **lastname-retouchrepair**
3. Adjust the tone and color of the image in Camera Raw (hint: click on the white rocks). Adjust numbers of the right if necessary. Remember "save image" then reopen image.
4. Adjust the tonal range (Hint: levels)
5. Remove the following items:
 - a. Plate with pizza
 - b. Empty plate
 - c. Clear glass
 - d. Boy in the back – may crop on the right if necessary - but NOT too much
6. Change the saturation (sponge tool) of the rocks and hedge on the left of the picture – brighten them
7. Adjust the highlights (dodge tool) of the grass to brighten this area.
8. Change the color of the yellow pants – both legs (color replacement tool)
9. Add an unsharp mask (Filter/Sharpen/Unsharpen)
10. Crop picture to make a pleasing picture
11. Image should be no bigger than 5 inches wide – resize if necessary
12. Add your name to the bottom left corner of the picture: change font, color size, shape
13. Save image as a .psd file
14. Change to CMYK (mode)
15. Save again as **lastname-retouchrepairCMYK.jpg** – NOT a .psd file!
16. Upload BOTH files to Google Classroom.
